# Project ReadMe

## Project Team Members

1. Manideep Reddy Mandadi (MRM190005)
2. Niamat Zawad (NXZ190009)
3. Sourabh Jaywant Choure (SXC200006)

## Steps to compile and run project

1. Download the zipped files and unzip them into a directory.
2. Type `cd ./project1` enter the directory
3. To compile type,

   `javac Main.java -d ./bin`

   This will create a `bin` directory where all the compiled files will be placed.
4. Enter the bin directory by `cd ./bin`
5. To start the program type,

   `java Main 0 ../config.txt`
6. For all the other nodes, no need to recompile, just perform

   i. `cd ./project1/bin`

   ii. `java Main <Node ID, from 1 to n-1> ../config.txt`
